A NEW SPEECH AND FINE MOTOR CLASS

Could your child use a little extra help developing their speech sounds or language skills? Or maybe they find fine motor activities challenging? If so, this could be the perfect class for them! Our professional staff includes a Speech Language Pathologist and Occupational Therapist ready to help your child develop age appropriate speech and language skills, along with fine motor and visual motor skills.

This class is not intended as Speech Therapy, Occupational Therapy or a replacement for any current intervention or therapies a child may be receiving. This class is designed to help children who may be challenged by certain speech sounds or fine motor activities.

WHAT HAPPENS IN CLASS?

Each class will focus on the correct production of one or two speech sounds, as well as reinforcement of age-appropriate understanding and use of language. We will pair this with fine motor and visual motor skills development in a sensory rich, fun-filled environment. There will be many fun activities, crafts, and even a small snack!

Tips for parents will be incorporated into each week so you can work on improving communication and reduce frustration at home.

Class is held Thursdays from 11:30 to 1:00 at a cost of \$90.00 beginning September 26th and running for 8 sessions (no class on 10/31). Children must be at least 3 years of age to participate and 100% potty trained.
